

GHA's Vision - Now and Into the Future:

GHA will be the premiere consultant partner in the Midwest, providing high-quality services and designs for our clients and community.

GHA will be forward looking, working toward a common vision that includes diversity and inclusion, a feeling of belonging, and built upon strong internal and external relationships.

GHA will build and maintain a strong culture, one built upon trust and growth, and our common values of Integrity, Dedication, and Passion.

Gewalt Hamilton Associates, Inc. (GHA), an employee-owned company, is a multidisciplinary civil engineering, surveying, and support services firm which represents a diverse group of clients that include municipalities; county and state agencies; school districts; hospitals; community colleges; park districts; senior care facilities and private developers. We offer a wide range of professional civil engineering, surveying, transportation, stormwater, environmental and geographic information services.

A proud history and service-oriented culture was established in 1981 by firm founders, Dave Gewalt and Bob Hamilton, driven to deliver engineering service that exceeded clients' expectations by always seeking efficiencies to contain costs and fresh options that reduce risk and maximize asset life.

MULTIDISCIPLINED STAFF

As a result of hard work, commitment, and ever-expanding engineering capabilities, GHA has grown to just over 100 staff professionals that include transportation, water, sanitary, municipal, and environmental engineers; wetland specialists; water and wastewater operators; and GIS specialists.

GHA also has Designated Erosion Control Inspectors, Certified Floodplain Managers, NASSCO certified professionals and LEED APs. Engineering personnel are supported by technicians, surveyors, CAD operators, construction managers and inspectors, and administrative assistants.

ATTENTION TO DETAIL

Municipal and construction engineering is who we are. The experience we have accumulated over the decades has always come with a true understanding of standards and associated best practices. Our construction engineering staff takes great pride in immersing themselves and taking ownership of each project. As an organization, our dedication to impeccable documentation is fueled by constant updating and enhancement of methods through education and certification.

A WIDE RANGE OF ENGINEERING NEEDS UNDER ONE ROOF

Over the years, our growth and diversification has been driven in large part by our desire to meet the changing needs of our public-sector clients.

By working with GHA, Clients benefit from our investigation of the latest regulatory requirements, industry trends, and technologies.

We offer a full range of services from project inception to construction close-out, including:

Municipal Engineering

Roadway/Highway Engineering

Construction Engineering

Site Design
