

# firm overview

Patrick is a national engineering + design, construction, management services, and technology firm. Since 1979, we have been providing services to local, state, and federal government agencies; private and public utilities; and FORTUNE 500 companies. Having worked in all 50 states and proven ourselves as a trusted partner, clients turn to us for the entire process of project delivery - from planning through construction to operation and maintenance. Patrick accomplishes this with a full suite of engineering disciplines, experienced construction managers, program management and project controls experts, and GIS and asset management technology specialists.

We serve clients in the transportation, utility + renewable, industrial infrastructure, and federal + institutional markets. We take pride knowing the projects we work on have a positive effect on the community, society, and the environment.

## local value

Patrick understands the meaning of the word "partnership." It means proven expertise, a positive outlook and a proactive approach. It means asking relevant questions and communicating in a timely manner to understand short-term needs and long-term objectives. It means recognizing the vision and validating the contributions of everyone on the team. Good partners understand the importance of collaboration and appreciate the responsibility of leadership. They keep working to get the job done, regardless of what it takes. At Patrick, we've embraced a partnering philosophy for more than 30 years. To facilitate this partnering relationship, Patrick locates its offices close to the offices of our clients so that we can clearly communicate and achieve faster solutions.

Choosing Patrick means working with local professionals who understand the regulations, communities and conditions of the states in which they perform work. Patrick's team of engineers have successfully partnered with an extensive list of local and regional clients on projects around the United States. Patrick has worked in all 50 states and is familiar with the tools and resources needed to add value to each project. Our commitment to our clients goes beyond each individual project and extends into the long lasting relationships we strive to maintain through our quality of work and a commitment to our client's specific needs. Our clients recognize this commitment, and that is why over 80% of Patrick's work comes from repeat business.

## national expertise

In addition to being a local partner, clients can benefit from Patrick's national experience and expertise. Patrick is a nationwide firm with more than 300 professionals located in multiple offices across the United States. The Engineering News Record (ENR) has included Patrick in its ENR Top 500 since 1993. We work with clients all across the U.S. and we understand national industry standards and practices.
